

**Before the  
FEDERAL COMMUNICATIONS COMMISSION  
Washington, DC 20554  
In the Matter of: )**

**Amendment of Part 97 of the Commission's Rules ) WT Docket No. 04-140  
Governing the Amateur Radio Services )**

**To: The Commission  
Reply Comments of Donald S. Wilson, K6DSW**

Donald S. Wilson is a licensed Amateur Radio Operator, licensee of station K6DSW.

These reply comments are timely filed in the matter stated above, and respectfully submitted for Commission consideration.

We support the ARRL's comments regarding the removal of the 200 watt PEP Power limit for General class or higher Licensees operating in "Novice" HF frequency segments.

We generally support the ARRL's comments in favor of expanding the HF frequency segments on which Phone emissions are permitted, particularly the expansion of the General Class allotments. An alternative approach would be, to permit the use of all ITU authorized emissions and bandwidths in the HF amateur bands, with the specific emission types and bandwidth set by the band plans developed by the ARRL and the IARU. This approach has worked well in the 160 meter band in the U.S., and is similar to HF amateur band usage in Canada.

Respectfully submitted
